1. This is the reset button. After you have sorted the information page however you wish, you can always hit “RESET” to list the bulls by chronological number order.
2. Once you determine which traits are important to you, you can click on the sort arrows to reorganize the bull list for that trait. The example above has been sorted for birth weight. Also of importance, when you select a sort, the top 50% of the bulls for each trait will be highlighted (as seen above) for each trait. Birth weight, weaning weights and yearling weights are represented in pounds and the other traits are represented in ranking.
3. Click on the bull number to pull up the picture of the bull, price, and details link. Click on the “details” link (6) to access his individual data sheet. Click on “close” (7) to close window.

7

6

If you click on the details link, a quick summary will appear (as seen below). To expand the information including pedigree, click on the “click here to VIEW XXXX Bull Data Sheet” (8). A comprehensive summary will appear. An example and details of the information are covered below.

4. Click on the Herdtrax link to pull up any information related to this animal and its relatives such as performance, treatments, sire, dam, and sibling information/indexes. The first view shows the animal link from the website. To pull up the dam or sire, click on the “view details” behind the name (9). This will pull up the animal selected from the pedigree. You will see a list of all their progeny, and any performance data or slaughter data for those offspring. If you wish, you can click on any of those progeny to look them up as well. At the bottom of the page, you will find the animals individual data as well as genotyping if available. To view any movement, weight or health events, click on the “Event History” tab on the top right corner (10).

Green 9030 G | 124000211855445 | Highway 21 Feeders

Gender: Calf-Bull

DOB: Mar 05, 2019

Age: 2 years 0 months

Colour: Black

Weight: 1612

Weight Date: 07/29/2020

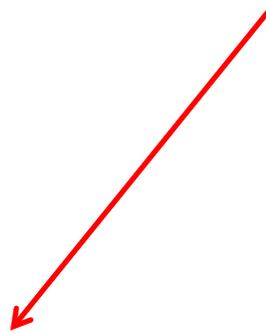

Classification:

Credentials: Natural

of Progeny: 0

Status: Active

5. Lastly is the breed composition/reference sire link. You can click on this to pull up the animals breed composition as well as its pedigree. Alternatively, it can also be found on the individual PDF attachment or the Herdtrax link. There are a few animals in the grouping that may not have a verified sire. In these cases, we don't want to post false information about the certainty of the breeding, but at the same time felt these bulls had the quality and test results behind them to add value to anyone's herd.
